Data Loggers for Clinical Research

Core Technologies

Uninterrupted and reliable monitoring of your Deep Freezers, Refrigerators, Stability Chambers, Stores etc is a primary requirement in your operations. We at Core Technologies understand your needs and have dedicated ourselves to providing exact solutions that meet compliance to WHO Norms and FDA Regulations.

Core Technologies has been manufacturing Data Loggers since 1988, and has supplied to prestigious organizations like DRDO, Hindustan Aeronautics, BARC where our products are operational in highly critical applications. We have a range of data loggers for Pharmaceutical Applications and have been supplying these to leading companies like Wochkardt, Macleods, IPCA, Rusan, Wallace Pharma, Wintac, Unique Pharma, Centaur Pharma and many more.

Several years of interaction with the Pharmaceutical industry, has given us a good understanding of the issues and challenges required to satisfy requirements of WHO Norms and to meet compliance with US FDA Regulations. We are happy that we have achieved success without compromises in our goals!

Our solution consists of primary data storage to our Pharma-LOG data logger and continuous data up-load to our Scan-LOG PC based software. It allows sensors to be placed more than 500 meters. We provide Fire Retardant Signal cables with routing hardware. Your utilities may therefore be located in different rooms without compromising on measurement accuracy.

We have provision to print the data directly from the logger on-line, off-line as well as up load to PC on-line or off-line.

We work as your partners, evolving the most optimal configuration and we stay by your side till the system is stabilized, your Auditors are satisfied and your customers are happy.

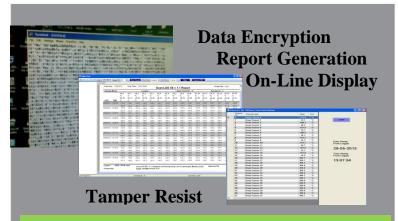

Pharma-LOG 100/16-32 Universal input Data Logger

Data Encryption
Report Generation
On-Line Display

Tamper Resist

- Non-stop data logging for months.
- Easy programmability from PC.
- Tamper Resist operation.
- Audit Trails and Digital Signatures.
- Multiple Pass words, Imposter Alarms.
- Local and Remote Alarms, SMS facility.
- Multiple level Data security.
- From small to very large operations.
- Exhaustive IQ, OQ, PQ and SOP docs.
- Sensor cables up to 300 Meters, **One** logger for all your equipments spread over wide area!
- NABL traceability – **Naturally!**
